

PROTOCOL CONCERNING THE HEALTH AND HYGIENE SECURITY IN THE FACE OF THE COVID-19

BEFORE ENTERING THE RESTAURANT

Installation of Thermographic Cameras

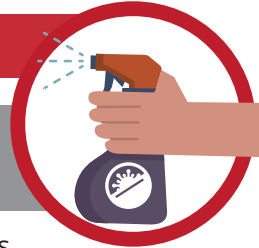

This system will allow us to immediately control and if necessary limit access, both to our employees and to our customers.

INSIDE THE RESTAURANT

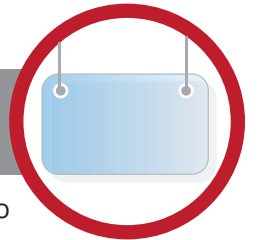

Constant disinfection and cleaning of facilities

The protocol regarding the disinfection of health risk facilities will be applied.

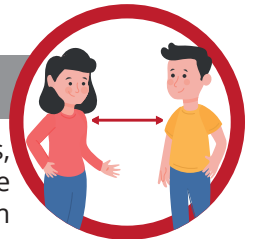

Protected stage with security screens

Torres Bermejas has installed security screens on the stage to guarantee the protection of artists and clients.

Reduced capacity and social distance

Following the recommendations of the competent authorities, the capacity of the restaurant will be reduced so that the distance between the tables can guarantee the minimum social distance.

Staff training

Specific training will be provided to all employees in order to ensure the utmost caution and prevent the spread of the virus.

Certificate of Disinfection

Global and periodic COVID-free disinfection by qualified personnel in the sector. The establishment has a certificate that accredits it.

IONIZER Air Purifier

Our Air Purifier has 4 levels of filtration. It is an air purification system that actively emits positive and negative IONS that propagate through the room and that will suppress the effects of airborne VIRUSES.

Hydro-alcoholic solutions

The whole establishment will have different dispensers of hydroalcoholic solutions. Likewise, each table will have individual containers for each custom.

Digital Applications

Access to contents by QR code, from each customer's own mobile phone.
